La ferme des animaux

## Animal Farm Summary

In *Animal Farm*, George Orwell crafts a fictional story about an animal rebellion gone awry to critique the real-life events that followed the Russian Revolution of 1917. Mr. Jones, the owner of Manor Farm, is a mean, heartless man who butchers the pigs and drowns dogs when they get too old. One day, a prize-winning boar named Old Major encourages the farm animals to rebel against the humans.

- Old Major dies just three days after proposing the rebellion. Three young pigs (Snowball, Napoleon, and Squealer) lead the resistance. When Mr. Jones gets drunk one night, the animals drive him and his men off the farm, which they rename Animal Farm.
- Together, the pigs write the Seven Commandments of Animalism, the new political philosophy that declares all animals equal. Under

Once again the animals seemed to remember that a resolution against this had been approved in the first days, and again Squealer was able to convince them that it was not so. It was absolutely necessary, he said, that the pigs, who were the brain of the farm, had to have a quiet place to work in. He was also more suited to the dignity of the leader (he recently had made Napoleon speak with the title of "Liceo") to live in a house than in a simple sty. However, some of the animals were disturbed when they heard that pigs not only took their meals in the kitchen and used the living room as a recreation room, but also slept in the beds.
